THE GRAND MASTER

A Magical Listening Experience

THE GRAND MASTER

A Magical Listening Experience

When **THE GRAND MASTER** speaks, it is evident that a new musical standard is being revealed.

Listening even briefly to the new **Hansen Audio** loudspeaker **THE GRAND MASTER**, the ease with which the nuances of the musical performance are captured and the incredible ability to demonstrate dynamic power, are readily apparent and are absolutely startling.

When music is being played through **THE GRAND MASTER**, the human body naturally begins to relax, letting the essence of the music penetrate the soul. Distortion level has been reduced to such a minute level that the typical loudspeaker “listening fatigue” has now been eliminated.

THE GRAND MASTER leaves the listener experiencing pure joy. While listening to your favourite well-recorded musical piece, pure magic happens.

The result is nothing short of a revelation, an unforgettable musical experience.

The Hansen Audio Exclusive Drivers – A Technological Break Through

THE GRAND MASTER is a 10 driver, 3 way, floor standing speaker using Hansen Audio's proprietary hand assembled drivers. The four Woofers and the four Mid Band drivers are engineered, designed and manufactured by Hansen Audio to match perfectly the two High Precision Tweeters. All Hansen Audio manufactured drivers use exotic **Multi-Layer Composite Sandwich** cones, resulting in the best **Sound Wave Deformation Prevention** in driver technology today. The inert composite sandwich material has no sonic signature and therefore is completely **neutral in sound**. The finished driver, utilizing our amazing powerful motor assembly, has the **fastest attack time**, the **quickest recovery time** and most **accurate tracking** possible.

The Hansen Audio Enclosure – A New Standard

Having designed and engineered the finest drivers and crossovers available, the task of designing the perfect enclosure begins. The traditional “panel construction” enclosure had to be abandoned. The result had to be a free flowing organic design to prevent any diffraction distortion. To accomplish this, the graceful enclosure incorporates the exclusive **Hansen Audio Sound Wave Diffraction Distortion Elimination** technology. The enclosures had to be “**Dispersion Coherent**”. The finished speaker had to be “**Phase Coherent**” both acoustically and electrically. The material had to be harder, stronger and more durable than conventional wood products. Most important, the material had to be inert, unlike all conventional wood products. The **Hansen Composite Matrix** material, with a final layer of material known as the **Cloaking Device**, is the result of this long and extensive research. The **Hansen Composite Matrix** material meets all of the desired sonic parameters. A **New Standard** had been set. The elegant **GRAND MASTER** is then finished in the beautiful **Hansen Audio** Class “A” finish.

Specifications

Time Coherent **Dispersion Coherent** **Tonal Accurate** **True Dynamic**
Frequency Response: 15 Hz to 23,000 Hz **Sensitivity:** 90 db **Nominal Impedance:** 8 ohms
Finishes: Hansen Audio Silver / Hansen Audio Black **Grilles:** Driver Protection Grilles Included
Woofers: Hansen 269 mm (X 4) **Mid Band:** Hansen 182 mm (X 4) **Tweeters:** 25 mm Dome (X 2)
Crossover: Hansen DAT (Driver Assimilation Technology)
Size: **Height** - 74 inches; **Width** – 25 inches; **Depth** – 31 inches
